

Provincial COVID-19 Communication Pathway —> Between Health Authorities and First Nations Communities:

If the result is POSITIVE: a positive result (with no personal identifiers) in a First Nations community will be communicated from the VCH Medical Officer to FNHA’s Chief Medical Officer who then notifies the FNHA Regional Executive Director who then will inform the identified political lead (Chief or Health Director).

If result is NEGATIVE: No news is good news! A positive test will be communicated within 24 hours. If capacity allows, Primary Care may follow up with the individual tested with a negative result. Client can also sign up for text notification.
